## EDUCATION

### Georgia Institute of Technology

Atlanta, GA

*M.S. Computer Science (Machine Learning)*

May 2027

*B.S. Computer Science (Artificial Intelligence & Devices)*

May 2027

- GPA: 3.86/4.0
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Systems & Networks, Statistics & Applications, Design & Analysis of Algorithms, Intro to Perception & Robotics, Intro to AI, Digital Design Lab, Computer Networking, Machine Learning, Computer Vision, Discrete Math

## EXPERIENCE

### AMAZON

May 2025 - August 2025

*Software Development Engineer Intern*

Austin, TX

- Built a testing system to generate synthetic packets using firewall traffic and validate invariance of proposed ACLs
- Developed a nested workflow to orchestrate traffic simulation and violation detection across varying subnet sizes
- Improved performance by up to 100x, enabling faster and more scalable ACL verification across Amazon FC sites

### FERNANDEZ LAB (GEORGIA INSTITUTE OF TECHNOLOGY) January 2024 - May 2025

*Research Assistant*

Atlanta, GA

- Used lab data to enhance machine learning predictions to tackle limitations in metabolomics due to a lack of data
- Compared state-of-the-art over-sampling generative models for metabolomics ML models, using a SMOTE baseline
- Generated realistic tabular data using LLM's, GAN, nbsynthetic, diffusion/flow-based gradient-boosted Trees

### GEORGIA TECH RESEARCH INSTITUTE - ELSYS

May 2024 - August 2024

*Hardware-In-The-Loop Test Design Intern*

Smyrna, GA

- Leveraged React JS, CSS, Django, & TypeScript to develop web applications to control/display hardware systems
- Integrated RabbitMQ queue manager to ensure a seamless connection between the hardware and various software
- Coordinated with a team of 30+ using AGILE methodology to ensure efficient development and communication

## PROJECTS

### PREDICTION OF COVID-19 PERCEPTION

January 2025 - May 2025

*Machine Learning Team Member*

Atlanta, GA

- Reduced data dimensionality via Multiple Correspondence Analysis and balanced class distribution with SMOTE
- Evaluated Logistic Regression & SVM; Random Forest achieved best results (72.8% accuracy & 0.90 macro AUC)
- Traced model decisions on attitudes on COVID to original financial stability features using permutation importance

### ALPHA KAPPA PSI PROFESSIONAL FRATERNITY

December 2023 - December 2024

*Software Development Director*

Atlanta, GA

- Collaborated with 9 teammates via weekly code Sprints and Agile Methodology to develop and maintain projects
- Utilized HTML, CSS, JavaScript, React, Python, Firebase, SQL, etc. for 4+ projects to accelerate operations
- Focused specifically on improving the UI / UX design of our applications to ensure a pleasant user experience

### GREENPLATE: HEALTHY MEAL TRACKING APPLICATION

January 2024 - May 2024

*Mobile Application Developer*

Atlanta, GA

- Developed a mobile application which leverages Firebase for authentication and a Java backend in Android Studio
- Designed application adhering to SOLID and GRASP principles to assist in sustainable meal tracking/planning
- Utilized AGILE and SCRUM principles in a 6 person team to ensure high quality and efficient project delivery

## SKILLS

**Software:** React, Postman, SQL, Django, Node.js, NumPy, Git, Firebase, S3, Lambda, QuickSight, CloudWatch

**Programming:** Java, JavaScript, C/C++, Python, Assembly, HTML, TypeScript, CSS

**Languages:** English (native), Hindi (native), Spanish (conversational)

**Interests:** Painting, Sketching, Running, Fashion Design, Crocheting, Traveling, Astrophysics, Sustainability

**Certifications:** MOS PowerPoint, MTA Software Development Fundamentals
